

coMraWave

**Converts wireless radiation into
harmonic wave forms that re-energise
your water, body and mind.**

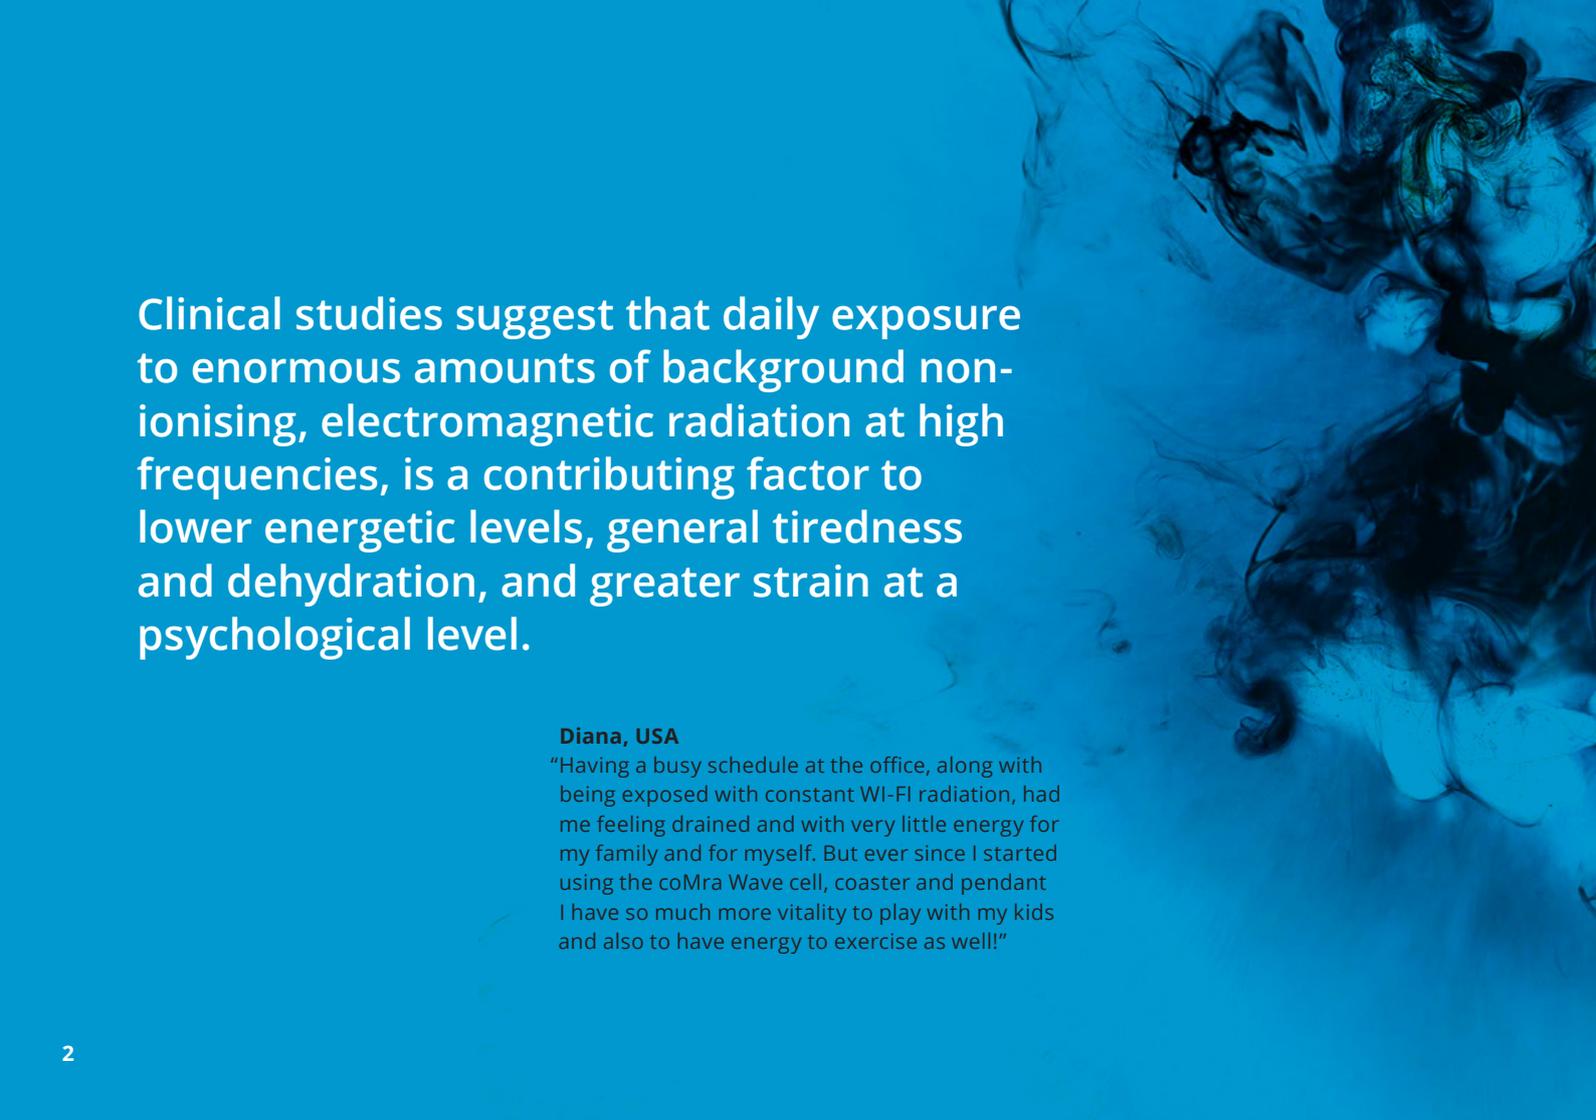

Why should we be concerned about wireless radiation?

There have been many scientific and medical studies to determine the long-term health effects of harmful electromagnetic radiation (EMR or electro smog for short), from digital devices – mobile phones, Wi-Fi networks, TV and satellite to name a few – and the effect on our general psyche and well-being.

Oliver, UK

“I was convinced by the measurable results for this product range which showed me that this is not another new-age product but something that can be shown to have a physical effect.”

Clinical studies suggest that daily exposure to enormous amounts of background non-ionising, electromagnetic radiation at high frequencies, is a contributing factor to lower energetic levels, general tiredness and dehydration, and greater strain at a psychological level.

Diana, USA

“Having a busy schedule at the office, along with being exposed with constant WI-FI radiation, had me feeling drained and with very little energy for my family and for myself. But ever since I started using the coMra Wave cell, coaster and pendant I have so much more vitality to play with my kids and also to have energy to exercise as well!”

How is wireless radiation harmful?

It's all about the water. Radiation from Wi-Fi, 3-4-5G, GSM and other digital technologies, make the structure of water – both in our body and in what we drink – chaotic and unhealthy. *What does that mean?...*

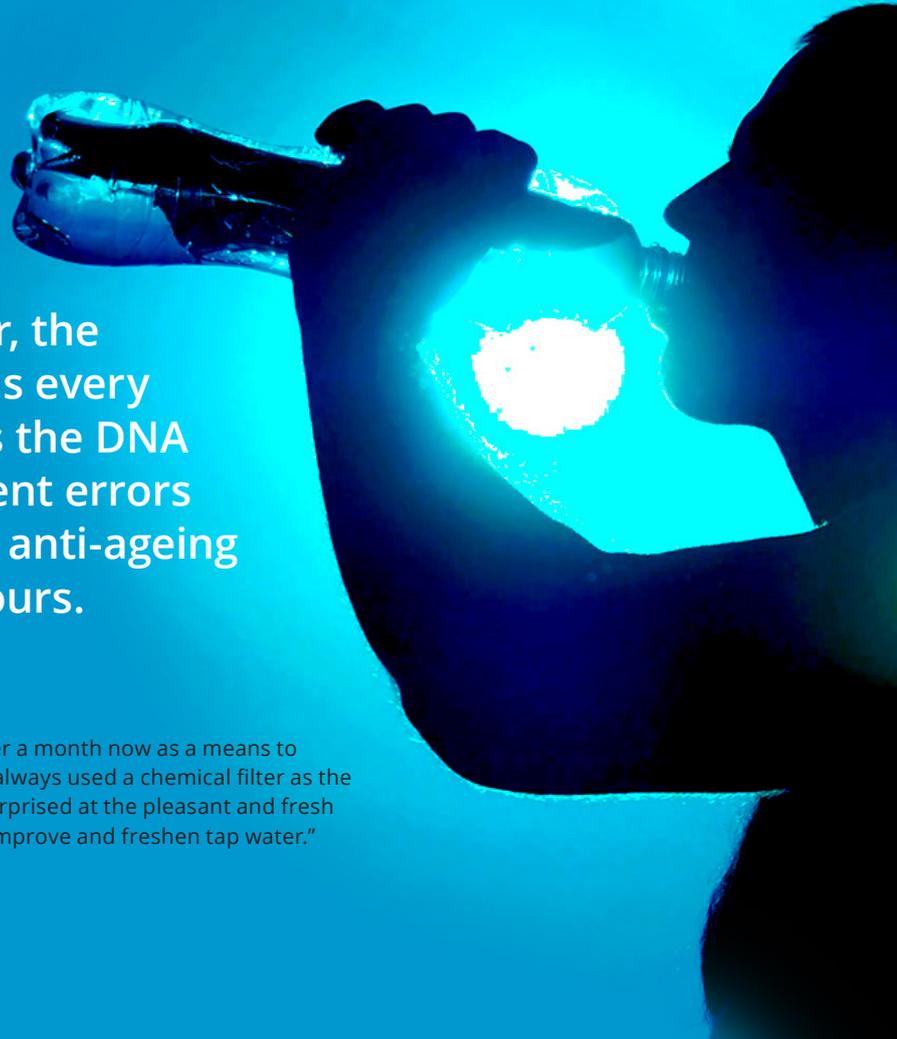

Alexander, USA

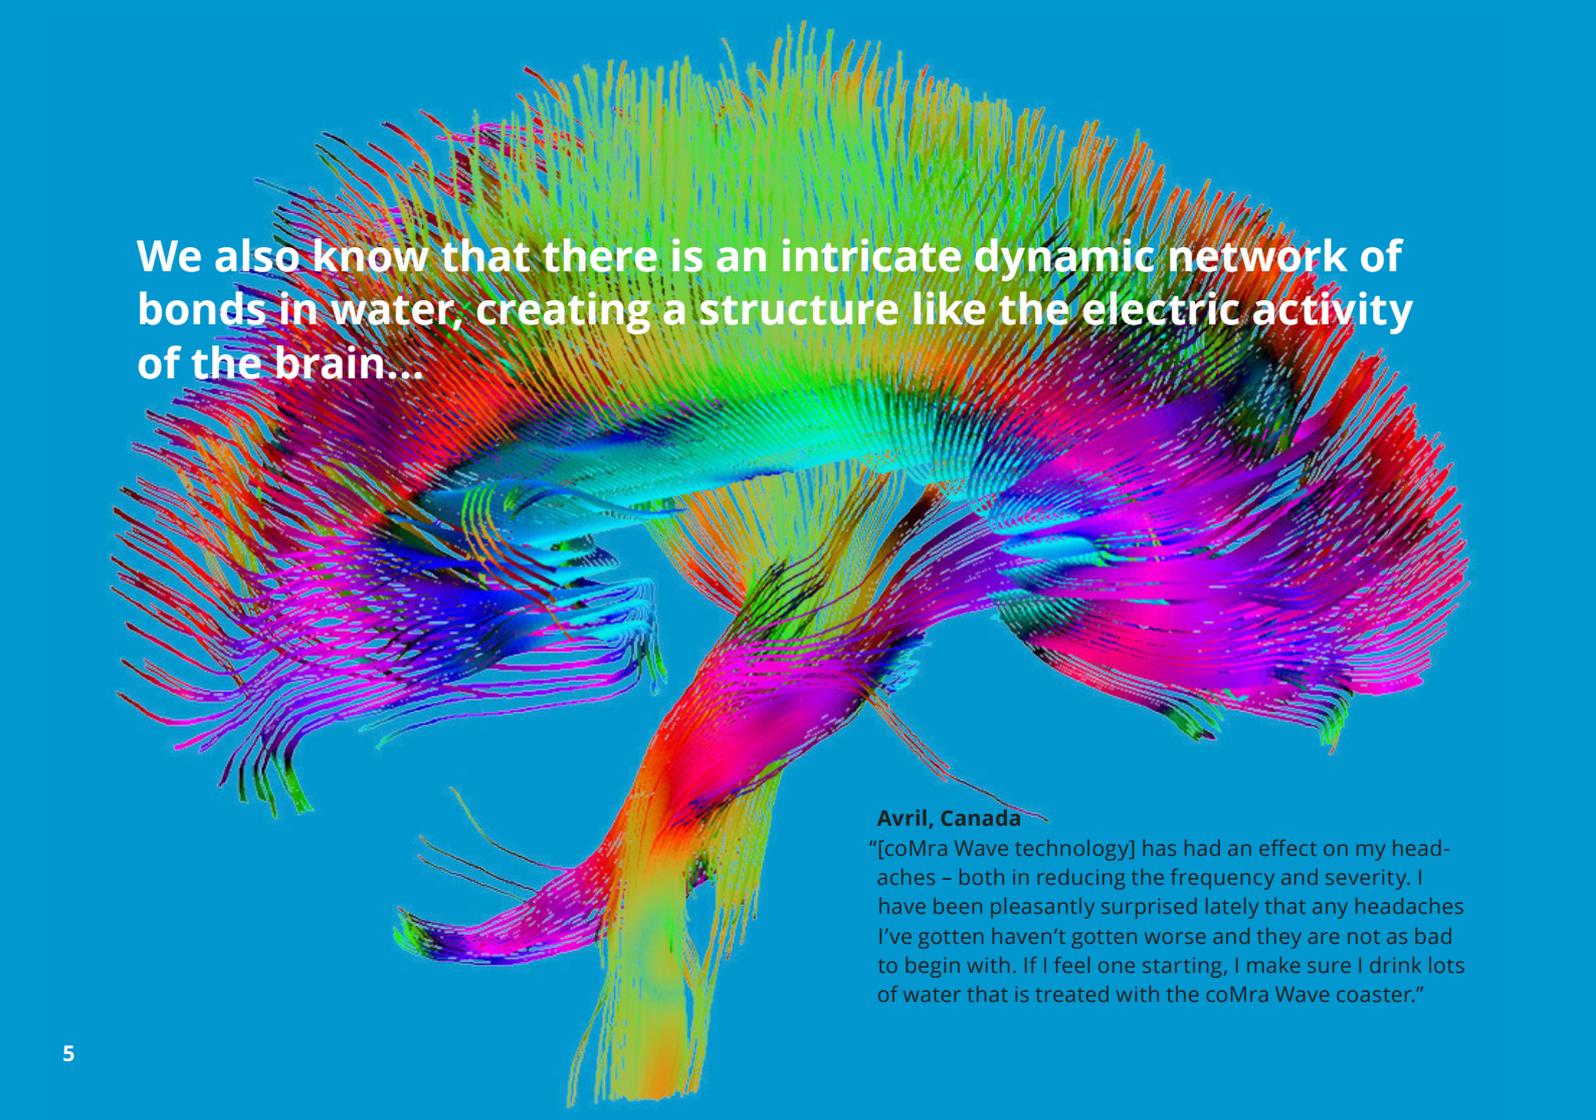

"I have known of radiation dangers from cell phone use for sometime now and in this case limited my children's exposure. Now with the coMra Wave Cell attached to my phone, I allow them a little more time with educational apps and games without feeling uncomfortable about it."

For example, through water, the body replaces 50 billion cells every single day. Water also helps the DNA replication process to prevent errors in our DNA. This helps with anti-ageing and the prevention of tumours.

Robert, UK

"I have been using coMra Wave for over a month now as a means to freshen tap water for drinking. I have always used a chemical filter as the water here has a stale taste ... I was surprised at the pleasant and fresh taste ... I recommend coMra Wave to improve and freshen tap water."

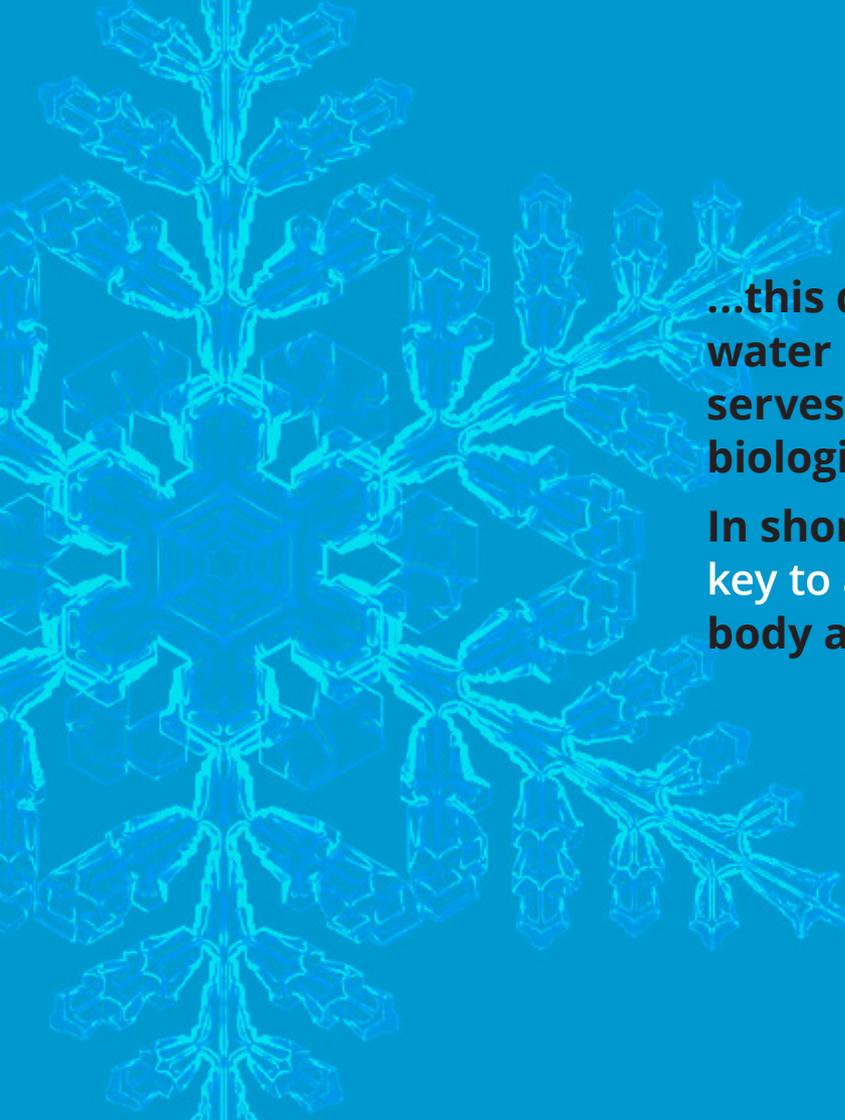

A complex, multi-colored fiber optic structure resembling a brain's neural network. The structure is composed of numerous thin, overlapping fibers in shades of red, orange, yellow, green, cyan, blue, and purple. The fibers are arranged in a dense, branching pattern that mimics the intricate connections of a brain. The background is a solid, bright blue.

We also know that there is an intricate dynamic network of bonds in water, creating a structure like the electric activity of the brain...

Avril, Canada

"[coMra Wave technology] has had an effect on my headaches - both in reducing the frequency and severity. I have been pleasantly surprised lately that any headaches I've gotten haven't gotten worse and they are not as bad to begin with. If I feel one starting, I make sure I drink lots of water that is treated with the coMra Wave coaster."

...this dynamic structure gives water its healing properties, and serves as a mediator in every biological process.

In short, water is alive and is the key to all healing effects in the body and mind.

Michail, Czech Republic

“I remember my first noticeable experience with the Pendant after just a few days of wearing it around my neck. It was a sensation of immensely increased physical and mental vitality and stamina ... With time that initial sensation was less noticeable, as my body and senses were becoming adjusted to that new energy level and the Pendant became indivisible part of my life style.”

How does coMra Wave technology help?

We've been producing medical devices for over a decade, and through our research we came to understand that improving the quality of water is key to optimal health.

Rebecca Diaz,

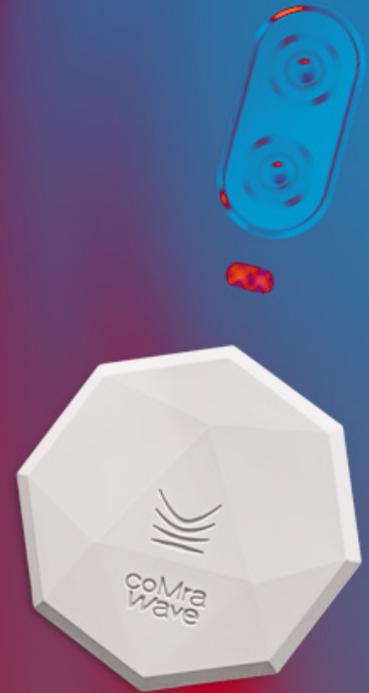

★★★★★ **Google review**

"coMra is my 'first aid' in a box! I absolutely love it! I use it for everything: sleep disturbances, pain, immune system, injuries, energy, fatigue, and much, much more! It has saved me a lot of money and trips to the doctor" ... [Read more.](#)

coMra Wave technology tackles the problem by re-balancing to the natural structure of water in a very unique way.

Let's go through a few examples in more detail;

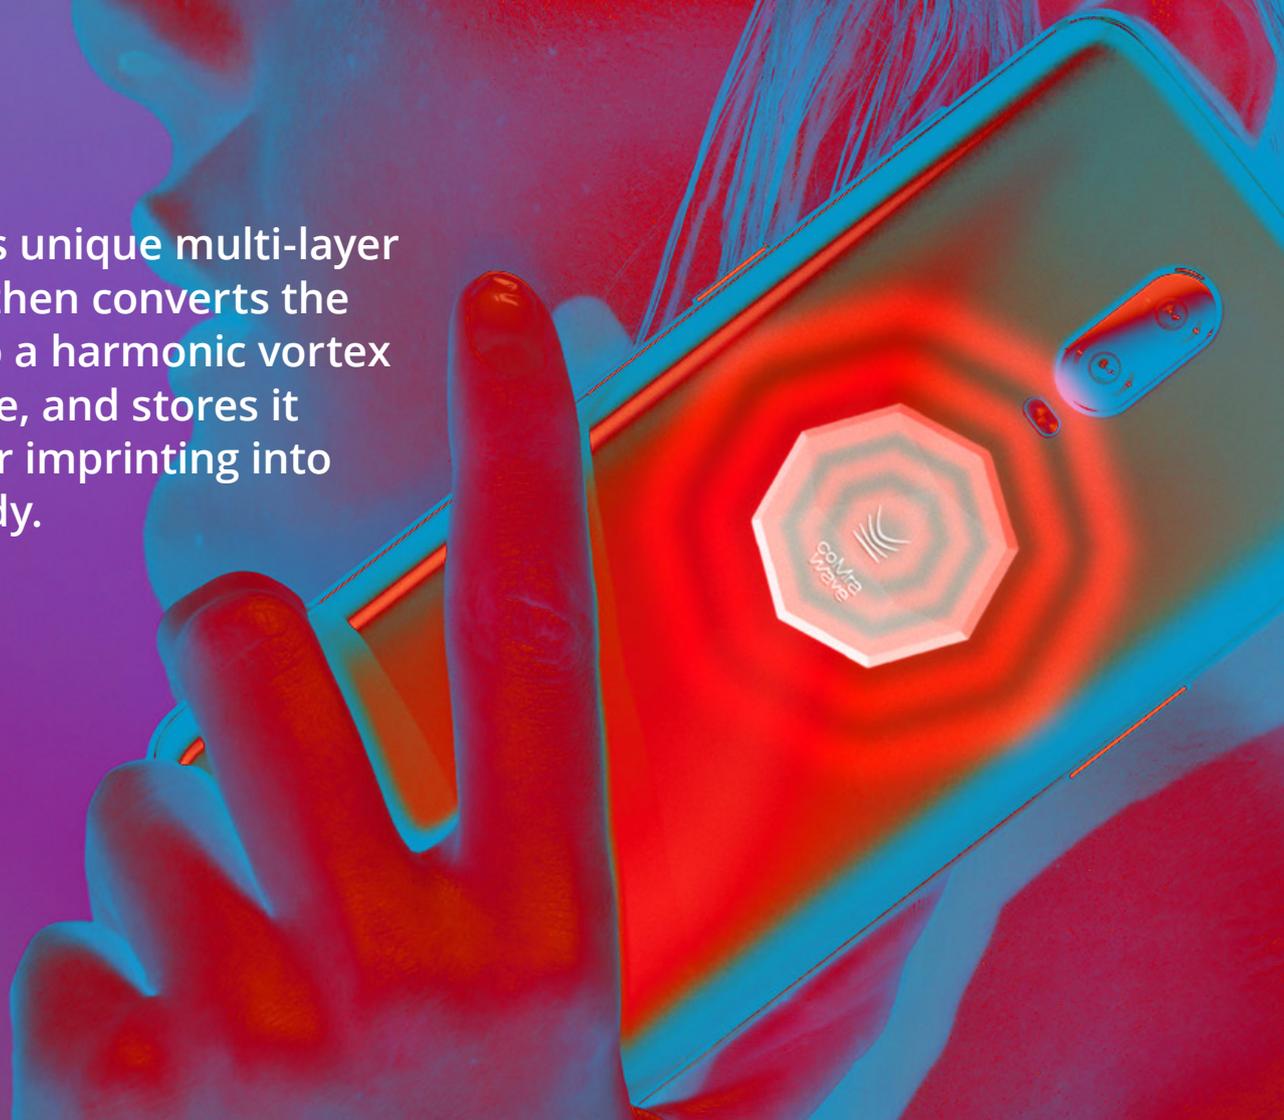

Attach a coMra Wave Cell to your mobile phone.

The Cell absorbs the harmful EMF radiation coming from your device, offering a level of protection just by having it close to you...

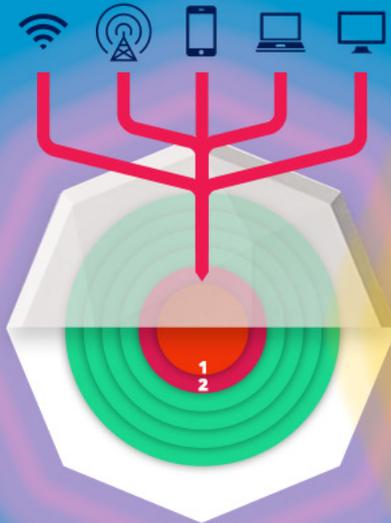

The Cells unique multi-layer system then converts the EMF into a harmonic vortex signature, and stores it ready for imprinting into your body.

coMra Wave multi-layer system

Layers 1 & 2

The **Broadband Receiver** collects harmful wireless radiation in the microwave band between 384MHz, 6GHz & beyond.

Layers 3

Wireless radiation accumulates, then feeds into a **Resonant Electromagnetic Signature Generator**, which creates a re-regenerative cycle pattern plus a rotational vortex motion to the electromagnetic energy.

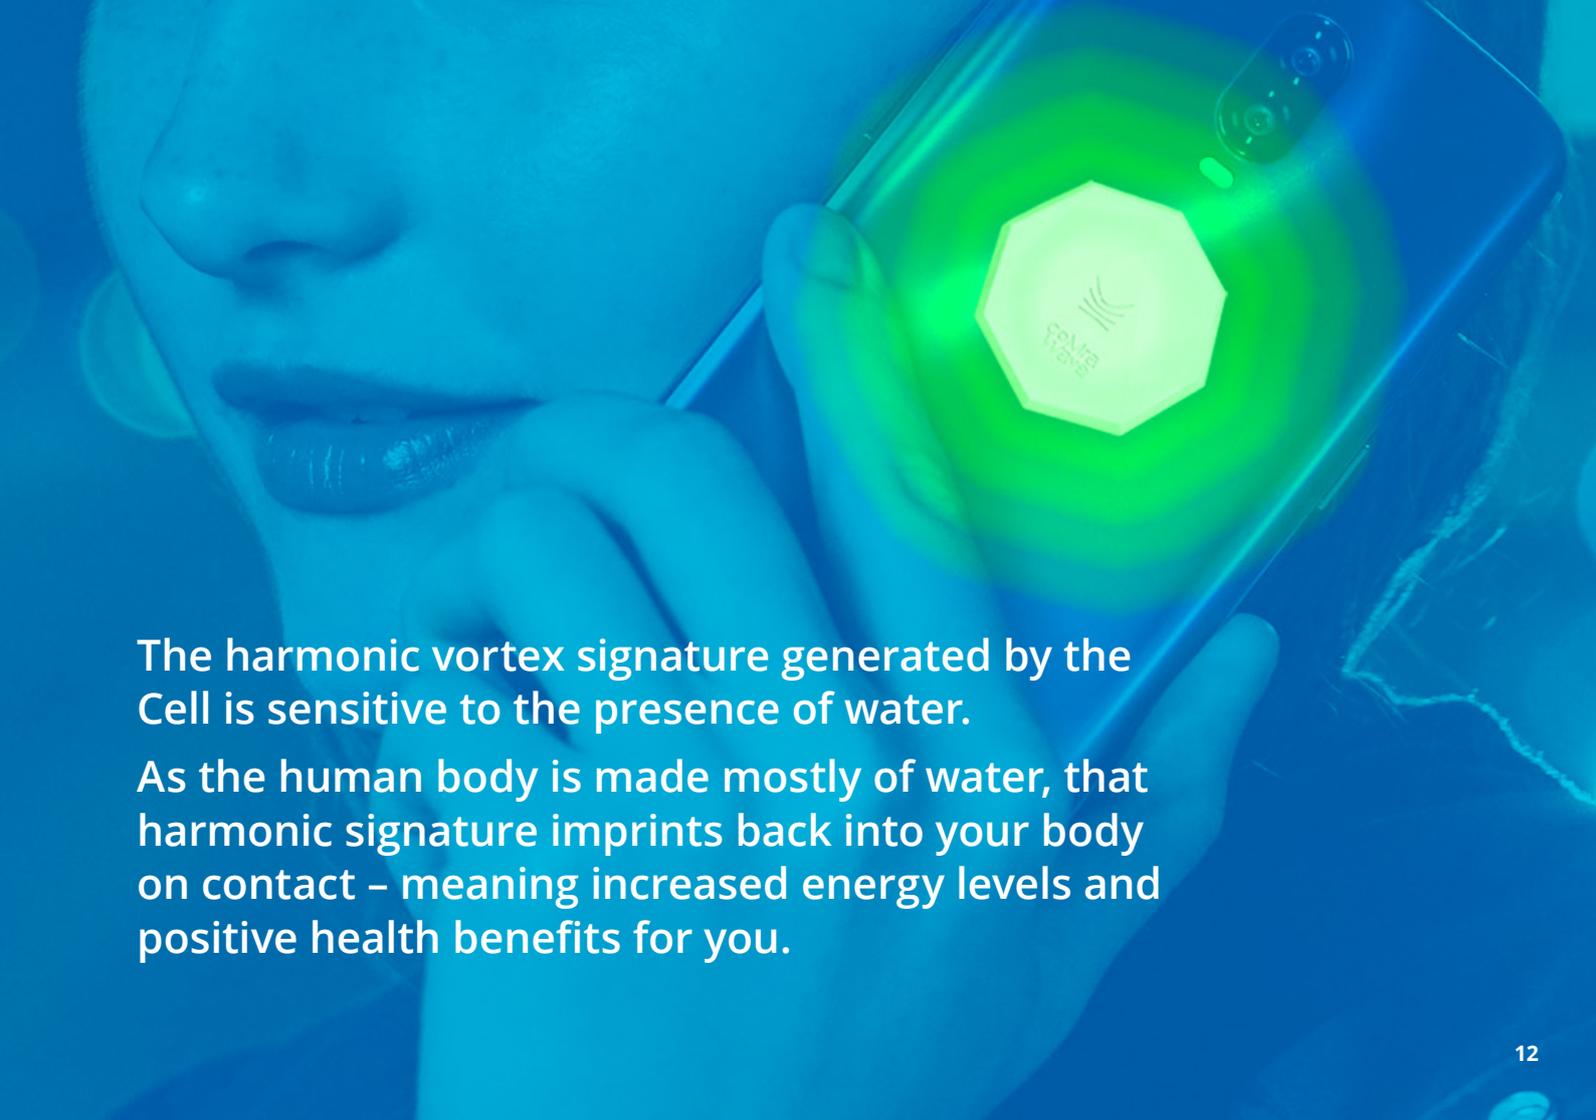

Layers 4, 5 & 6 (& 7*)

The electromagnetic energy then feeds into a sequence of **Phase Delay Resonators** in a specific spatial geometry.

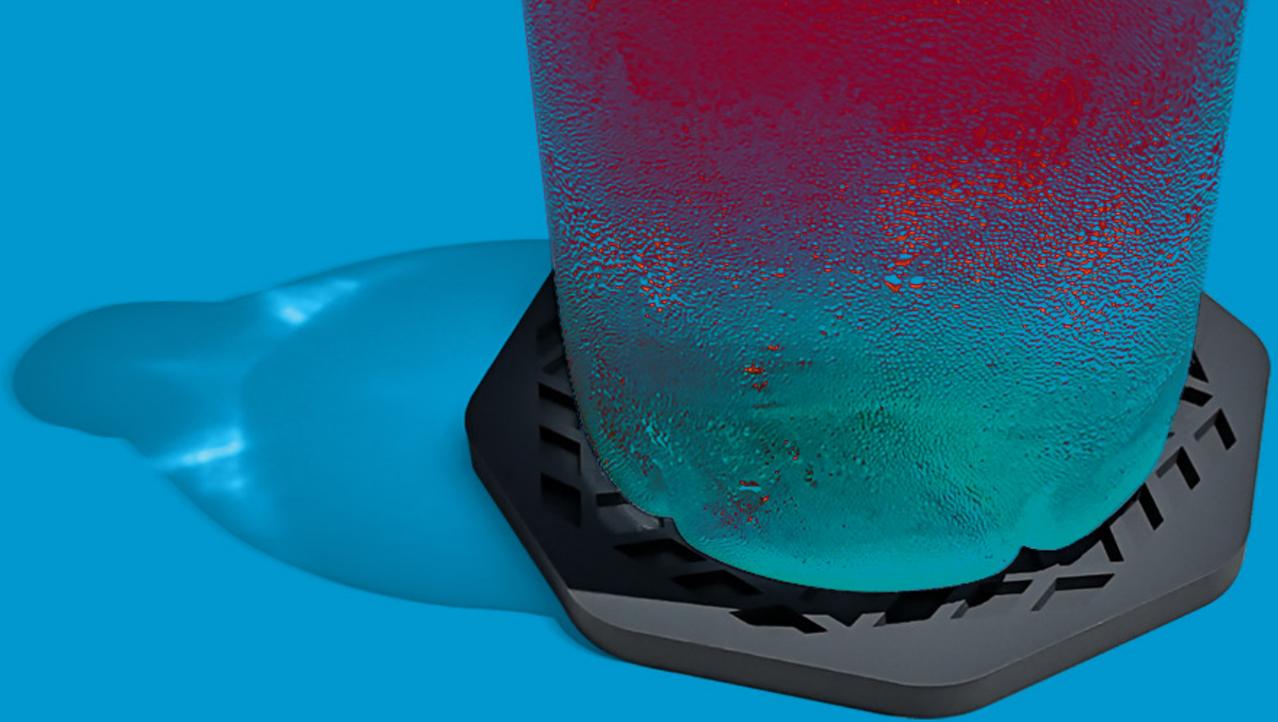

* Some products may have an additional 7th layer (quartz crystal interface), designed to accumulate and focus the delivery of the vortex signature.

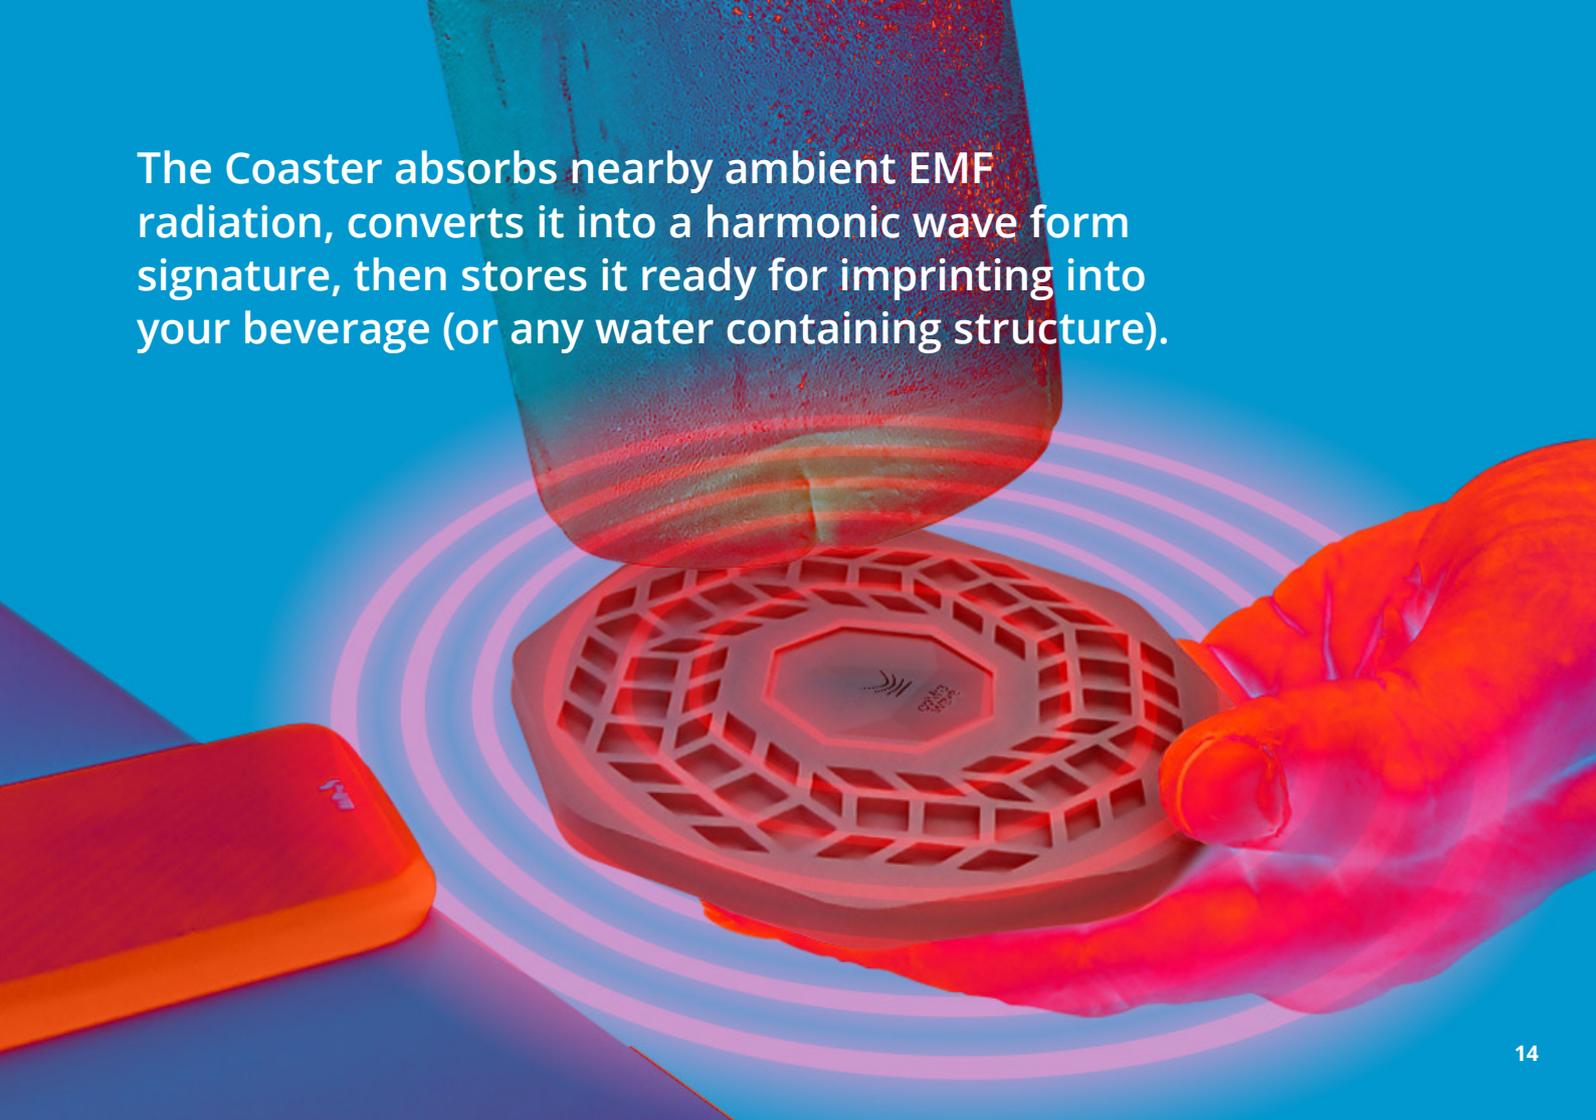

The harmonic vortex signature generated by the Cell is sensitive to the presence of water.

As the human body is made mostly of water, that harmonic signature imprints back into your body on contact – meaning increased energy levels and positive health benefits for you.

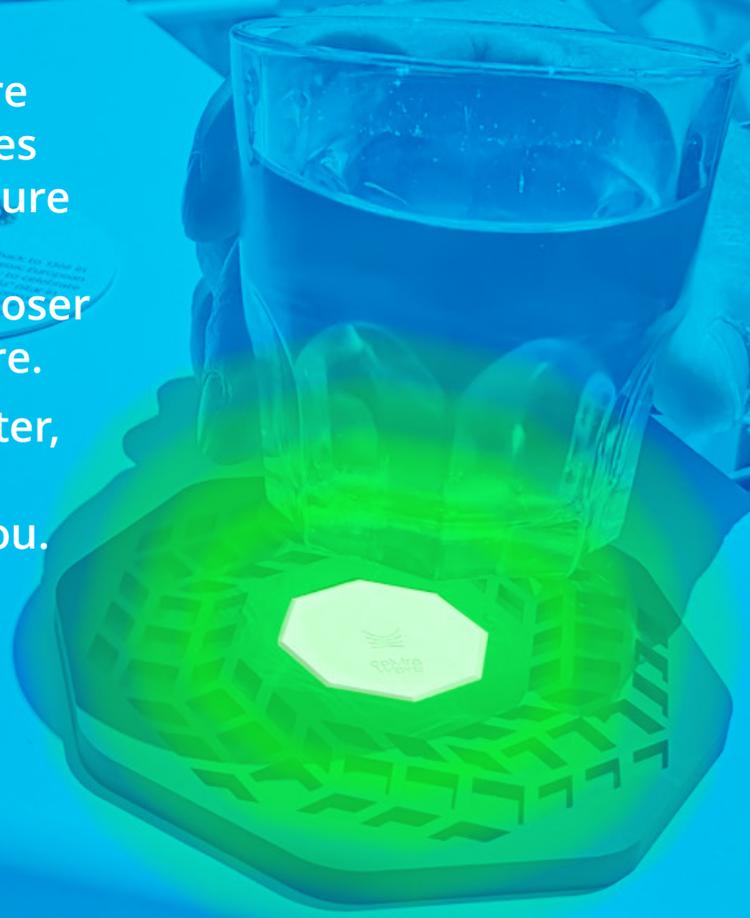

Place a bottle of water on a coMra Wave Coaster.
Any beverage will work, but let's use a 1 litre bottle
as an example...

The Coaster absorbs nearby ambient EMF radiation, converts it into a harmonic wave form signature, then stores it ready for imprinting into your beverage (or any water containing structure).

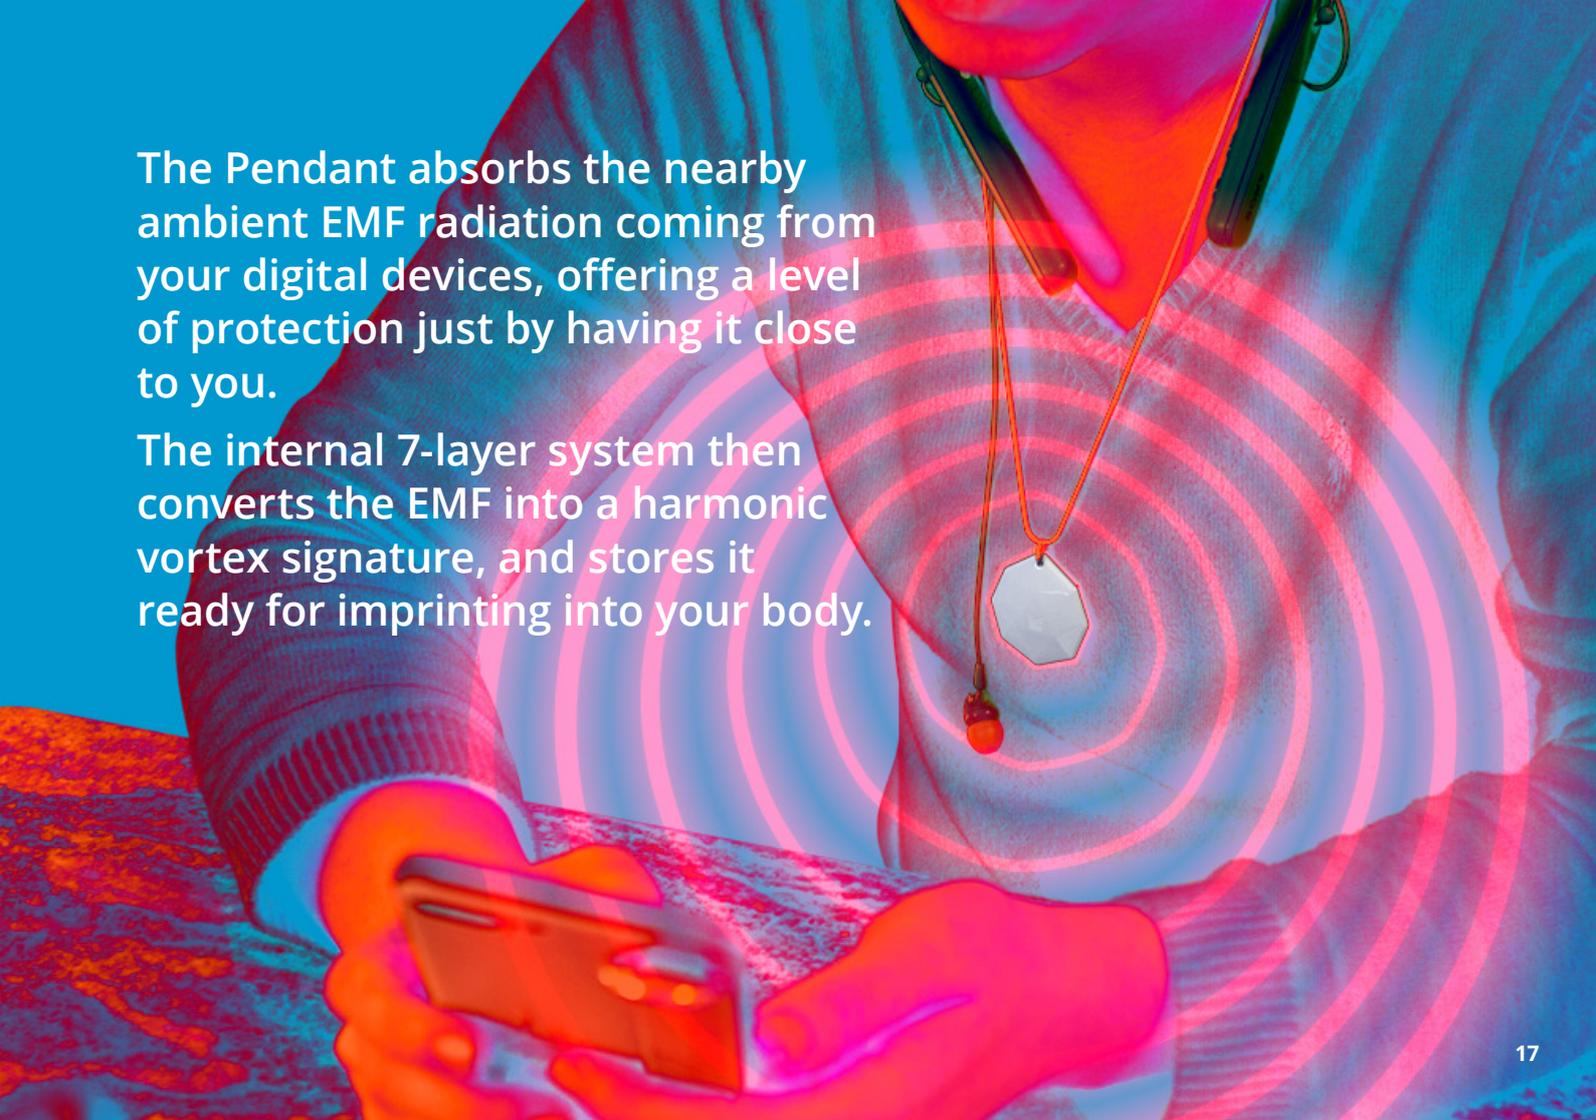

The harmonic vortex signature generated by the Coaster takes about 10 minutes to re-structure and re-energise one litre of nearby water – producing a closer state of water to that in nature. This means better tasting water, increased energy levels and positive health benefits for you.

The coMra Wave Pendant offers the greatest level of protection.

It has an additional layer of quartz crystal, engineered to accumulate and deliver that vortex signature back into your body with greater efficiency than a standard coMra Wave Cell.

A person is shown from the chest up, wearing a grey sweater and a necklace with a white, octagonal pendant. They are holding a smartphone in their hands. Overlaid on the person's chest is a series of concentric red circles, representing an energy field or vortex signature. The background is a blurred outdoor scene with green grass and a blue sky.

The Pendant absorbs the nearby ambient EMF radiation coming from your digital devices, offering a level of protection just by having it close to you.

The internal 7-layer system then converts the EMF into a harmonic vortex signature, and stores it ready for imprinting into your body.

The harmonic vortex signature generated by the Pendant is sensitive to the presence of water.

As the human body is made mostly of water, that harmonic signature imprints back into your body on contact – meaning increased energy levels and positive health benefits for you.

Scientifically tested, proven and patented

Dissolved Oxygen analysis

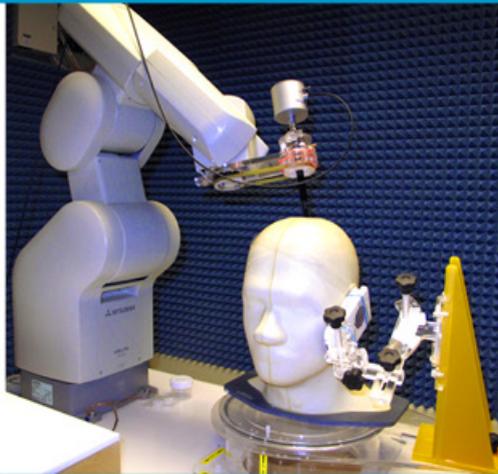

The dissolved oxygen in tested, filtered, reverse osmosis (RO) water fell from 85% to 68% – thus the bulk body was re-balanced closer to that of natural spring water.

Radiation Absorption tests

Results show that coMra Wave technology accounts for around 15% reduction of transmitted field strength in standby mode, and between 20-50% during a call.

Nuclear Magnetic Resonance test

NMR017 testing results show that coMra Wave technology transformed water into a new tested line width of 59Hz, which is closer to the dynamics of water as it is in nature.

We have tested our technology in the lab, with people, pets and plants, and we've gathered user feedback from a pilot run with hundreds of people over the course of 7 years. *The results from all our tests show that coMra Wave technology re-balances the quality of the water closer to that of water as it is in nature.*
